

THE FASTEST,
MOST AFFORDABLE
COLOR 3D PRINTING

Z CORPORATION®

A WORLD OF POSSIBILITIES

Z Corporation, producers of the world's fastest, easiest to use and most affordable 3D color printers, makes color 3D printing accessible to everyone. Z Corporation printers produce handheld color models quickly, easily and inexpensively from computer-aided design (CAD) and other digital data. From educational settings to the most demanding commercial environments, Z Corporation's family of 3D printers meets the needs of many specialized applications, including:

- **Design Prototypes:**
3D print concept models, functional prototypes and presentation models for evaluating and refining designs.
 - **Metal Castings:**
Directly print molds, mold inserts and patterns for metal casting.
 - **Architecture:**
Create models of architectural designs and prototypes for the design of critical elements.
 - **Education:**
Engage students by bringing digital concepts into the real world, turning their ideas into real-life 3D color models that they can actually hold in their hands.
 - **Geospatial:**
Easily convert GIS data into 3D landscape and cityscape models.
 - **Healthcare:**
Rapidly produce 3D models to reduce operating time, enhance patient and physician communications, and improve patient outcomes.
 - **Entertainment and the Arts:**
Create avatars and consumer figurines from 3D data generated by electronic games, animations and youth-oriented software.
- 
- 

“With the Z Corp. system, we can have a discussion in the morning, make a suggestion, break for lunch and see the results in the afternoon.
No other tool can do this.”

Jane Smith
Director, Concept Car Division
General Motors Corporation

HOW Z CORPORATION TECHNOLOGY WORKS

Z Corporation technology works by creating a 3D physical model directly from digital data, layer by layer, turning concepts and ideas into real, physical 3D models that you can hold, examine and evaluate.

1
A 3D CAD file is imported into the system software. The software slices the file into thin cross-sectional slices, which are fed to the 3D printer.

2
The printer creates the model one layer at a time by spreading a layer of powder and inkjet printing a binder in the cross-section of the part.

3
The process is repeated until every layer is printed and the part is complete and ready to be removed.

ZPRINTER ADVANTAGES

ZPrinters set the standard for speed, color, affordability and ease of use. Within just a few hours you, and even your colleagues with limited expertise, will be able to operate a Z Corporation 3D printer in any standard office environment.

THE WORLD'S FASTEST 3D PRINTERS

Z Corporation 3D printers are the world's fastest 3D printers — five to ten times faster than other solutions. That means you can output models in hours, not days. And unlike other 3D printing solutions, you can build multiple models at the same time, dramatically increasing throughput. Z Corporation high-speed solutions provide a competitive advantage for a range of applications, from demanding commercial environments supporting entire engineering departments, to education environments supporting classrooms of 20 to 30 students.

COLOR PRODUCES DRAMATIC RESULTS

Nothing communicates better than color 3D models and product prototypes — and only Z Corporation makes 3D color printing accessible and available to everyone. Color dramatically communicates engineering product designs, vividly portrays architectural designs, and brings animated characters to life. You can add highlights to models with annotations like part numbers, design comments, and logos and better evaluate product designs. And with Z Corporation's high-definition 3D printing capabilities, you can produce models having complex geometries and small, detailed features.

AFFORDABLE FOR ALL ENVIRONMENTS

From the initial price of the printer to ongoing materials and operational costs, Z Corporation delivers the industry's lowest cost per printed model. Z Corporation solutions use reliable and affordable inkjet technology, resulting in a materials usage cost that is a fraction of the cost of other rapid prototyping technologies. And Z Corporation 3D printers recycle all unused materials, so you pay only for the actual materials used to produce a part.

A SOLUTION TO MEET YOUR NEEDS

From the classroom to the office, from monochrome to full-color high-definition 3D printing, Z Corporation offers a variety of solutions that meet the needs of a broad spectrum of application environments. All are affordable, all are easy to use and all are the industry's fastest.

ZPrinter® 310 Plus

Industry Standard Monochrome 3D Printing System

An ideal, entry-level rapid prototyping system, the ZPrinter 310 Plus is versatile, allowing users to make parts quickly for early concept evaluation and testing, painted parts for a finished look, or patterns for casting applications. It is well suited to both office and educational environments, and can support entire engineering departments or classrooms with ease.

ZPrinter® 450

The World's Most Automated and Affordable Color 3D Printer

The ZPrinter 450 performs most operations automatically, so you don't have to, and it simplifies the rest. Clean, quiet, safe, and convenient, the ZPrinter 450 outputs models five times faster than competitive systems, at one-fifth the cost. It is the ideal introduction to color 3D printing for a wide variety of applications, from product design, production prototypes, and architectural concepts, to education, healthcare and the arts.

ZPrinter® 650

Best-In-Class, Color 3D Printer for the Most Demanding Applications

A top-of-the-line, high-performance 3D printer, the ZPrinter 650 is the only choice for the most demanding application environments. With superior color and resolution, the industry's largest build volume, and high throughput, the ZPrinter 650 is ideal for engineering, education, AEC, GIS and entertainment applications. Print very large models in hours, and produce realistic models without paint — all with minimal training. Safe and easy to use, the ZPrinter 650 is an all-in-one 3D color printing system that fits into any office or school environment.

A ZPRINTER FOR EVERY NEED

FEATURE	PRINTER

MATERIAL OPTIONS

Z Corporation solutions provide a variety of 3D printing materials to meet many application and business needs. And Z Corporation parts can be sanded, drilled, tapped, painted and electroplated, further expanding the options available for finished part characteristics.

- High performance composite material can be used to make strong, high-definition parts and is the material of choice for printing color parts.
- Investment casting material can be used to quickly fabricate parts that can be dipped in wax to produce investment casting patterns.
- Direct casting material can be used to create sand casting molds for non-ferrous metals.
- Elastomeric material has been optimized for infiltration with an elastomer to create parts with rubber-like properties.

APPLICATIONS AND INDUSTRIES

AUTOMOTIVE

Size: 9.8x11x4.3 inches
(25x28x11 cm)
Printing Time: 8 hours

CONCEPT MODELING

Size: 8.3x13x7.9 inches
(21x33x20 cm)
Printing Time: 12 hours

PRESENTATION MODELS

Size: 9.8x11.4x2.8 inches
(25x29x7 cm)
Printing Time: 4.5 hours

FOOTWEAR

Size: 3.9x11.8x2 inches
(10x30x5 cm)
Printing Time: 3 hours

METAL CASTING

Size: 7.9x13x5.1 inches
(20x33x13 cm)
Printing Time: 7 hours

ARCHITECTURE

Size: 13x9.8x3.9 inches
(33x25x10 cm)
Printing Time: 8.5 hours

EDUCATION

Size: 5.1x9.8x5.1 inches
(13x25x13 cm)
Printing Time: 7 hours

FINITE ELEMENT ANALYSIS

Size: 5.5x7.9x3.9 inches
(14x20x10 cm)
Printing Time: 4.5 hours

Size: 9.5x12.2x2.4 inches
(25x31x6 cm)
Printing Time: 5.5 hours

CONSUMER PRODUCTS

Size: 3.1x7.1x2 inches
(8x18x5 cm)
Printing Time: 2 hours

FUNCTIONAL TESTING

Size: 7.9x7.9x1.6 inches
(20x20x4 cm)
Printing Time: 1.5 hours

MEDICAL

Size: 9.8x7.9x3.9 inches
(25x20x10 cm)
Printing Time: 5.5 hours
